

How do I... create a model portfolio?

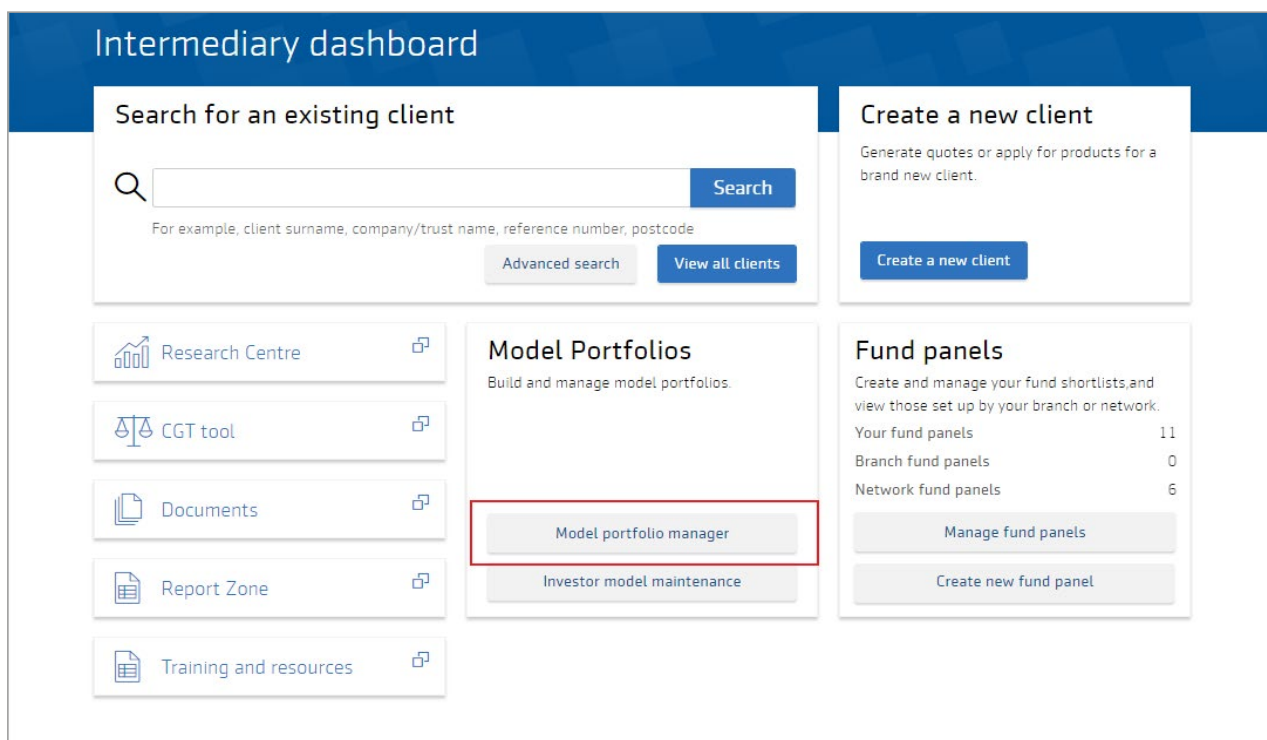

Model portfolios allow you to design a panel of funds based on your client's needs. And, with it all online you can quickly track how the funds are performing and make changes easily if you need to.

Use this step-by-step guide to create a model portfolio on the Aegon Platform.

Create a model portfolio

- 1 Sign in to your dashboard and select **Model portfolio manager**.

- 2 Here you can search for, create and view model portfolios. Use the table to see your firm's existing model portfolios and their status. Select **Create new model portfolio** to begin.

Task information

Model Status:

- Draft - The model isn't available for use with investors until submitted.
- Open - The model is available for use with investors.
- Closed - The model is closed for use with new investors, but can be updated and rebalanced for investors already linked to it.
- Inactive - The model is closed and isn't available for use with investors
