Second medical opinion service

Our second medical opinion service gives you confidence in your, or your family member's, diagnosis and treatment options. It allows you to get a confidential face-to-face consultation, with a UK-based specialist who's local to you.

RedArc, who provide this service, will allocate a dedicated personal nurse to discuss your medical history – your diagnosis, current treatment plan and other important information. They'll confirm if a second medical opinion is right for you and if so, arrange an appointment with a specialist.

The specialist will review your diagnosis and current treatment and consider the options available to you. At the consultation, you'll have the opportunity to discuss your condition, your current treatment, and any additional treatments that may be available to you from the NHS or through private care. The service includes:

- Long-term support over the phone from your personal nurse, before and after the consultation, to discuss results and consider the next steps.
- A face-to-face consultation to help you understand your initial diagnosis and consider the treatment and options available to you.
- Recommendations and treatment advice in line with the UK National Institute for Health and Care Excellence (NICE) guidelines, that are available in the UK.
- A copy of the detailed report compiled by your specialist.

There's no cost for your specialist consultation and nurse support, however, other costs like travel expenses, additional tests, prescriptions or ongoing treatments aren't included.

Funeral payment pledge

The loss of a loved one can leave families facing financial hardship. Even if it's for a short time while waiting for the estate to be distributed, it can be a real burden when you're already dealing with a loss.

Our funeral payment pledge helps bereaved families meet the funeral costs of their loved one. We'll pay the funeral director or funeral home an advance claim payment of up to £10,000 on valid life protection claims, where probate/confirmation causes a delay.
