Do you have multiple pension pots?

With your Aegon pension, you can transfer in pensions from other providers.

Combining your pensions in one place can save you time in the future.

Why bring your pension pots together?

The convenience of a single pot means you won't have to trace lost pensions or contact multiple providers to access your savings when the time comes. It could also reduce the amount of paperwork you have to handle.

Combining a pension may not be the best option for you. You may lose features, protections, guarantees or other benefits - so make sure to compare products before combining. It's up to you to decide if this is the right decision for you. If you're not sure, speak to a financial adviser - there may be a charge for this.
