We'll provide you with a flexible platform, quality engagement material, scheme governance and our supporting guidance service, Aegon Assist.

We'll help you set up and run the scheme with the employer, allowing you to do what you do best, give face-to-face advice.

By partnering with us you won't have to do any of the heavy lifting and through the scheme you'll have access to high-net worth individuals who really need your skills and your expertise.

Why Aegon Retirement Choices?

Our Aegon Retirement Choices (ARC) platform makes it easy for employers to help employees save for their future. Employers will benefit from:

- seamless scheme set up and administration, including ongoing robust investment and scheme governance. We'll also support them with their auto-enrolment requirements;
- proposition flexibility - employers can use the ARC to offer their employees a plan for life. Members can access a simple pension-only (SIPP) solution and/or a full wealth management service combining SIPPs, ISAs and GIAs;
- investment choice - investment options range from our straightforward default solution for members who don't want to make an investment choice to a comprehensive self-select investment range including funds, shares and investment trusts;
- a gating facility - employers can control the investment choice they offer to each member, including the ability to create tiered solutions within the same scheme;
- transparent and capped charges - a scheme can have the same competitive administration charge across all savings products, and
- tailored communications and resources to help employers engage employees with their finances.
